

PRODUCT SPECIFICATION SHEET

Concrobium Mold Stain Eraser is a powerful cleaning solution that targets and removes mold and mildew stains quickly and easily with no scrubbing. The innovative two-part system contains no bleach and won't damage or discolour surfaces. The solution is safe and easy to use and has many benefits including:

> **Superior Performance** - Unique formula outperforms bleach by targeting and removing tough mold and mildew staining without discolouring or damaging surfaces.

> **Ease of use** - Requires no scrubbing and no rinsing; just wet the surface and allow to dry!

> **Biodegradable ingredients** - Leaves no chemical residue on the treated surface.

RECOMMENDED USES

Concrobium Mold Stain Eraser can be used outdoors and indoors to remove mold and mildew stains safely and effectively. The solution can be used on surfaces such as wood and composite wood, concrete, masonry, drywall, grout, stone, fiberglass, tile, plastic, laminate, aluminum and metal.

Concrobium Mold Stain Eraser is IDEAL for removing mold stains from decks, patios, fences, walkways, railings, gutters, roofs, outdoor furniture, boats, outdoor canvas, bathrooms, basements, and fabrics.

APPLICATION GUIDELINES

Application - Always test on an inconspicuous section before using. You will need a bucket, water, mixing stick, and a pump sprayer. Prior to application ensure that the surface has been cleaned to remove any dirt, grime, or debris.

mold stain eraser™

1- Empty contents of part 1 into a bucket with 1 gallon (3.78L) of warm water. Mix and then add contents of part 2 into the bucket.

2- Stir solution with mixing stick. WAIT 10 MINUTES BEFORE APPLICATION, stirring regularly to dissolve all powder.

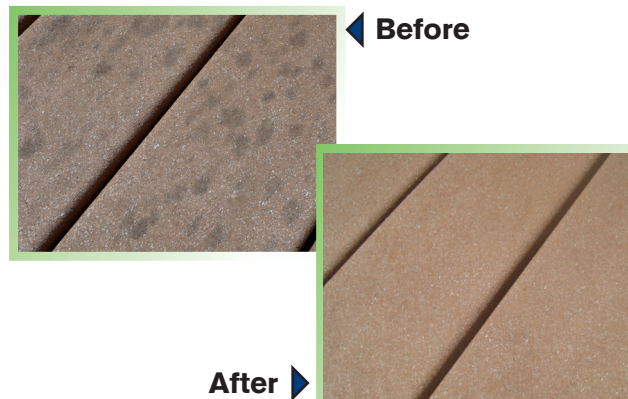

3- Pour mixed solution into a garden pump sprayer and apply mixture to target area.

Treated surfaces will typically be free of mold staining after a single application, but in cases of severe staining, a second application may be required.

Coverage - Cleans approx. 250-300 sq. ft. depending on surface absorbency and extent of mold staining.

Product Specification Sheet

Gloves Off® Tough Stain Remover is a revolutionary cleaning solution that removes the greasiest and toughest stains and spills with no harmful chemicals.

Rather than relying on corrosive chemicals, Gloves Off uses Dynamic Surface Tension Technology™ to penetrate deep into sticky messes to help lift and remove even the most difficult stains.

Usage

Gloves Off is safe for use on almost any hard and fabric surface including wood, baseboards, laminated surfaces, flooring, hard plastics, rubber, metal, glass, masonry, brick, tile, grout, fiberglass, clothing, upholstery and carpet.

Removes stains such as:

Dry latex paint, pet stains, oven grime, soap scum, pen, crayon, marker, food & wine spills, chewing gum, adhesive, glue, grease, tar & oil stains, make-up, and many more.

Dry Latex Paint

Pet Stains

Greasy Ovens
& Stains

Adhesive
& Chewing Gum

Pen, Crayon
& Marker

Food
& Wine Spills

Soap Scum

Grease, Tar
& Oil Stains

Benefits

Safe for users and the environment

- > Minimal odor and non-irritating on skin
- > No harmful chemicals

Tough on stains and spills

- > Features Accelerated Dynamic Surface Tension to rapidly penetrate and lift all stains
- > Removes the toughest, greasiest stains and spills

Cleaner Ingredients

- > Naturally derived
- > Readily biodegradable

How To Apply

Always test on inconspicuous section first

HARD SURFACES: Apply directly on affected area, briefly allow to penetrate stain and then wipe off. For more difficult stains, allow product to stand for 2-3 minutes before wiping off. Scrub with a brush or scouring pad if necessary. Rinse surfaces as required.

**TOUGH STAIN
REMOVER &
DEGREASER**

For
ALL TYPES
of **MESSES**

FABRICS AND CARPETS: Apply a small amount of product on affected area and blot with a wet cloth. Repeat if necessary. Following treatment of clothing, launder items separately according to manufacturer's instructions.

Ingredients

Water, coconut based surfactant, propylene glycol propyl ether, chelating agent, baking soda, washing soda, potassium silicate and potassium hydrate.

Certification

Readily biodegradable
OECD 301D – 28 days

introducing

concrobium moldcontrol®

**a revolutionary new
weapon in the battle
against mold**

- > kills fungi and fungal spores
- > prevents mold and mildew growth
- > eliminates musty odours
- > 100% natural, odourless and biodegradable

unmatched efficacy and safety

Efficacy

- > Concrobium is unlike other DIN registered fungicides because it works by physically encapsulating fungi and fungal spores, inactivating and killing them as the solution dries
- > In addition, once Concrobium has dried on surface, it forms an invisible, antimicrobial shield that continually denies microbe attachment and prevents new mold growth

Safety

- > Concrobium is 100% natural and is comprised entirely of FDA-approved food additives
- > Concrobium contains no ammonia, chlorine, alcohol or VOCs and has no harmful off-gassing
- > Concrobium is classified as 'Category IV' (lowest toxicity rating) by the EPA and poses no health risks to users or to occupants
- > Concrobium requires no special handling instructions or safety equipment and is ready-to-use
- > Concrobium is 100% biodegradable with no special disposal requirements

DIN registered with Health Canada
as a Fungicide/Fungistat.

also available in 946mL spray bottle
and 20L pail formats

concrobium moldcontrol®

IDEAL FOR

- > **Mold remediation in homes, businesses or institutions**
- > **Mold prevention following flooding or water damage cleanup**
- > **Pre-treatment of building materials for mold resistance**

ease of use

Concrobium offers cleaning, disinfection and long-term protection in a single, easy-to-use product. For professionals, a single product means lower costs and increased job efficiency:

- > Concrobium can be used on virtually all surfaces without risk of damage
- > Concrobium leaves no harmful residue that may pose risks to children or pets
- > Concrobium is odourless and does not contain any fragrances that will irritate your staff or customers during or after the job
- > Concrobium can be applied using a standard industrial fogger, facilitating treatment of large or inaccessible areas

concrobium at work

Concrobium can be used throughout a mold remediation or water damage restoration job to ensure successful abatement and long-term prevention:

- > As an initial step, apply Concrobium to the entire area to encapsulate and kill the fungal spores and prevent further contamination
- > Use Concrobium in combination with a cloth or brush to remove stains from surfaces where desired
- > Fog Concrobium into inaccessible areas where mold is found or suspected and where removal of building materials is not practical
- > After the site has been cleaned and refinished, apply Concrobium throughout the treated area to leave an additional level of protection against mold growth
